SPECIAL LETTER NEW DISCOUNTS

Gentlemen:

Our operation has expanded and for the past five years we have been operating 500 acres.

It is our earnest desire to retain the close personalized "feel" and service to our customers which, unfortunately, is so often lost in expanding operations. In order to do this we are desirous of cultivating larger-volume buyers, wherein more efficiency and savings can be realized in expediting orders as well as in growing costs -- and we will pass these savings on to our customers. Our endeavor is to also maintain a wide selection of varieties and sizes of many types of plants, enabling customers to make up larger volumes without difficulty.

In view of the above we are pleased to offer the following:

A 5% discount allowed if remittance accompanies order, or when paid in full on delivery.

A maximum 5% discount allowed on orders totaling \$1500.00 or more, expedited within a digging season and paid within our terms.

A maximum 10% discount allowed on orders totaling \$2500.00 or more, expedited within a digging season and paid within our terms.

Please study these discounts. Maximum discounts listed -- do NOT add them together. Discounts apply to each digging season. Either Spring (January 1 through June 30) or Fall (July 1 through December 31) No carry-over.

All material will be billed at prices listed in our current catalogue. All invoices MUST be paid in accordance with our published terms. (2% 10 days net 30 days to those establishing accounts) Earned discounts will be computed at the end of each digging season and allowed in the form of a credit memorandum to apply to future orders. Delivery charges remain net, due and payable when stock is delivered.

We're looking forward to the pleasure of serving you.

Yours sincerely

INTRODUCTION

Once again it is our pleasure to present you with a copy of our new wholesale list.

As always, our endeavor is to grow the finest plants possible. By selecting the better type plants of all varieties and propagating from them we believe we have accomplished much toward this end; and have introduced many new superior varieties and types. All our plants receive the best possible care: they are root pruned and transplanted so as to develop a fine root system; they are sheared, sprayed, fed, cultivated and watered to assure compact, clean plants. Your orders are dug and handled by experienced men in the very finest manner, and prompt delivery in our own 32' closed trailer is available if you so desire. Our every effort is directed toward developing and growing good heavy plant material offered at the lowest possible price, and to merit your confidence and good will. Your patronage makes this possible and we wish to express our appreciation with a most hearty Thank You!

You are most cordially invited to visit either or both of our farms. Our office is located at Angelica, near Reading, Pa. Please address all correspondence here. (R. D. #1, Mohnton, Pa.) Our Maryland farm is located on the Eastern Shore at Chesterville, Kent County. My sons, LeVerne and Tim will be glad to show you around there. We look forward to the pleasure of your visit.

Yours sincerely,

TERMS AND CONDITIONS

This list cancels all previous quotations and prices listed herein are subject to change without notice. Material offered subject to prior sale.

All prices are f.o.b. our nurseries.

All stock when especially selected in the nursery will be sold at prices commensurate with the values of the specimens chosen.

Terms: Deposit required on all orders to be held more than 60 days. Cash in advance unless satisfactory arrangement is made when orders are placed. 5% discount allowed. To those establishing accounts with us terms are 2% 10 days, net 30 days. Interest at 6% per annum to be paid after maturity.

Plants become your property upon delivery to carrier and we cannot be responsible for loss, damage, or delay in transit.

We express or imply no warranty as to productiveness or life of stock. We assume no liability for delay or failure in filling orders due to strikes, accidents, crop failures or other causes beyond our control. It is mutually agreed that our liability for untrueness to name is confined to free replacement or refund of purchase price.

Claims must be made in writing within five days of receipt of goods.

All orders are based on the distinct understanding that the purchaser agrees to the conditions of sale as stated above.

Please use your printed business stationery in all correspondence.

DELIVERY SERVICE

Arrangements can be made to deliver full trailer load orders, for which a reasonable charge is made. Quite often, less than trailer load lots can be combined with other orders consigned to the same locality.

Delivery charges are always net, due and payable when stock is delivered.

WHEN PICKING UP STOCK WITH YOUR TRUCK please be sure to send a tarpaulin or suitable covering to protect your plants from drying out on the road. We will supply labor to load your truck and during the busy planting season can arrange to load your truck in the evening or Sundays if necessary.

AQUIFOLIUM (English holly)

English and Chinese hollies have been tested along with opaca varieties. By the same process of elimination we have selected varieties with good growth and fruiting characteristics and outstanding hardiness as well. Our stock plants have become well acclimated to Northern weather over the years giving us considerably hardier strains; in many cases better than some so-called "hardy" opacas.

Altaclarensis—Bright green leaves. Good red fruit

Camellaefolia—Large, broad, reddish-green leaves. Large red fruit

Father Charles—Large leaves, reddish-green with some teeth. Large red fruit

Fisheri—Glossy, rather long leaves. Bright fruit

Jan Van Tol—Dark green leaves. Bright red fruit.

Pyramidalis Compacta—Small light green evenly spined leaves. Abundance of red fruit.

Above is a partial listing of varieties. Other varieties also available. Not every variety in every size. Substitutions made when necessary unless otherwise stated.

4" deep flat of own-root Hybrid Rhododendron Transplants

RHODODENDRON LINERS (Hybrids)

Rhododendron liners are cutting grown. They are transplanted from rooting media into 4" deep flats and pruned. They make one and two growths in greenhouse and/or shadehouse, are hardened off, cut out with a peat ball and individually wrapped in heavy waxed paper for pickup or shipment. They should be lined out under shade. Pickup of these plants is preferable. Most orders can be left in flats, assuring no deterioration whatsoever.

Varieties: Most standard varieties available as listed in B&B section, plus others. 'Connoisseur' and yellow varieties grown on order.

Standard varieties80 ea. per 100

'Connoisseur' & yellows 1.00 ea. per 100

Quantity discounts on liners

1,000 to 5,000 plants — less 5%

over 5,000 plants — less 10%

Minimum order — 100 plants.

Order early—prior to November 1 for following Spring, to assure best selection of varieties.

With their strong fibre root system our cutting grown rhododendrons will definitely make a heavier salable size plant in less time without the weakness of union, suckering of understock and phytophthora (wilt) disease so common in grafted rhododendron.
